About the Wooden Figurines

Each piece is carefully handcrafted from FSC-certified oak, ensuring both high quality and responsible forestry. The natural material and organic shapes give the figurines a unique, tactile character — like small stories carved in wood. The design is created with deep respect for Tove Jansson’s universe and with an aesthetic that invites calm, reflection, and play. Nothing is mass-produced — each figurine carries its own soul, its own expression”

It starts with only one ...
